SUMMARY OF FINDINGS

In 1983-84 there were 28 fatalities which were the result of accidents or diseases. Of these, 14 persons were fatally injured while working, 7 received fatal injuries while travelling to or from work and 7 died as a result of industrial diseases. There were 36 cases of persons sustaining permanent total disability from accidents while working and 39 as a result of industrial diseases.

The number of claims for events resulting in at least a week off work plus all noise induced hearing loss claims fell again in 1983-84 by 4.1 per cent to 12,605.

NO. OF ACCIDENTS AND DISEASES

While the number of diseases which involved 1 week absence was smaller than that of accidents, the severity was much greater. The average time lost was 12.5 weeks for diseases compared with 6.0 weeks for accidents while working and average compensation paid \$11,759 compared with \$6,282 for accidents.

Diseases of the musculoskeletal system and connective tissue (mainly 'repetitive movement' conditions) was again the major disease category increasing from 57.3 per cent of all diseases in 1982-83 to 61.7 per cent in 1983-84. The next most significant category was diseases of the skin and subcutaneous tissue and that share decreased from 13.0 per cent to 10.1 per cent.

SUMMARY OF FINDINGS (continued)

Of the 10,299 accidents while working, more than half (5,476) involved sprains and strains while open wounds accounted for 1,515, contusions and crushings 1,089 and fractures 1,024.

NATURE OF INJURY

The distribution of these accidents by type of accident is shown in the following graph.

TYPE OF ACCIDENT

EXPLANATORY NOTES

INTRODUCTION

Statistics in this bulletin have been compiled on the basis of the year each event (accident or disease) OCCURRED, rather than on the basis of the year in which each claim was closed as was the case before 1980-81. Reports compiled from workers compensation claims are submitted by insurance companies, self-insurers, and State Government departments through the South Australian Department of Labour.

2. The reporting system provides that for events which occurred during 1983-84:

- (a) reports were to be completed progressively as claims were closed;
- (b) for claims unclosed at 30 September 1984, insurers were to submit reports during October 1984 including their estimates of final outcome, total payments and absence.

3. Not all relevant reports were received in time for inclusion in this publication. Appendix E provides an indication of the extent of late reporting. Furthermore, a number of relevant cases are possibly never reported despite attempts to check that reports are received for all claims coming within the scope of the collection. Users should therefore be cautious in interpreting year to year movements.

4. Only claims within the scope of the South Australian Workers Compensation Act, 1971 are included provided that they result in any one of the following:

- (a) death;
- (b) permanent total disability;
- (c) noise induced hearing loss;
- (d) absence from work of one week or more.

Notable exclusions are most self-employed persons and employees covered by the Compensation (Commonwealth Government Employees) Act 1971. Exclusion of self-employed persons is likely to have a marked effect on figures for industries where self-employment is prevalent (e.g. retail trade, rural industries). Because of the exclusion of employees covered by the Commonwealth legislation, some industry classifications are not covered at all (e.g. defence services and communications), while coverage is reduced in other industries.

5. Some details of journey and recess accident cases, noise induced hearing loss disease cases involving time lost from work of less than 1 week and of re-opened cases are included in various appendices. Details of these cases are excluded from Tables 1-23.

DEFINITIONS

6. For the purposes of this collection the following definitions have been adopted.

Agency of accident. The underlying factor (object, substance or circumstance), other than human failing, which was most closely associated with the accident and which in general could have been guarded against or corrected.

Amount paid. Compensation for wages lost and hospital and medical payments and lump sum settlements. Estimates in respect of unclosed claims are included. Payments recovered under third party motor vehicle insurance policies are excluded.

Date of occurrence. For an accident, the date the original injury occurred. For a disease, the date on which the employee last worked or, for noise induced hearing loss cases involving no time lost from work, the date on which the hearing loss was diagnosed or the date the claim was made, whichever was earliest.

Industrial accident. An event following an isolated and sudden exposure to a hazard and resulting in a compensatable work injury. Such events may occur while working, while travelling between one's residence and place of work (journey cases) or during recess periods.

Industrial disease. A compensatable condition exhibiting at least one of the following characteristics:

- (a) the slow and protracted nature of its cause;
- (b) its ascribability to repeated or continuous action of a mechanical, physical or chemical nature;
- (c) the indeterminateness of the time of its beginning;
- (d) possible individual predisposition as a factor in the development of the condition.

Type of accident. Either the manner of contact of the injured person with the object or substance, or the exposure or movement of the person which resulted in the injury.

CLASSIFICATIONS

7. For the purposes of this publication the following classifications apply.

Agency and type of accident. Both classifications are based on those recommended by the International Labour Office (ILO).

Nature of disease/injury. Both based on the ninth revision (1975) of the World Health Organisation's International Statistical Classification of Diseases, Injuries and Causes of Death.

Industry. The workplace of the injured worker is classified in accordance with the 1978 edition of the Australian Standard Industrial Classification.

Location of injury. The location of the principal injury is classified in accordance with ILO recommendations.

Occupation. Classified in accordance with the 1981 Population Census Classification of Occupations.

(d) data on journey and recess accident cases and certain noise induced hearing loss cases were introduced for the first time.

RELATED PUBLICATIONS

9. Other ABS publications which may be of interest include:

Workers' Compensation Statistics, New South Wales
(6301.1)

(6303.2)

Industrial Accidents, Queensland (6301.3)

Industrial Accidents, Western Australia (6301.5)

Industrial Accident Statistics, Tasmania (6301.6)

COMPARABILITY OF SERIES

8. Before 1980-81:

- (a) details for non-fatal events were compiled for the year in which each claim was closed, except where a claim remained open for three years. In this latter case the claim was treated as closed for statistical purposes after three years;
- (b) diseases caused by an identifiable single event were classified as accidents;
- (c) events resulting in permanent total disability had 'time lost' statistically set at 156 weeks.

From 1980-81:

- (a) details are compiled for the year in which the compensatable events occur;
- (b) diseases described as being caused by a single event are classified as diseases;
- (c) no 'time lost' is applied for events resulting in permanent total disability;

10. Unpublished data from the South Australian collection may be available upon request.

11. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS Office.

SYMBOLS AND OTHER USAGES

- n.a. not available
- n.e.c. not elsewhere classified
- n.p. not available for publication but included in totals where applicable
- r figures revised since previous issue
- .. not applicable
- nil or rounded to zero
- break in continuity of series (where a line is drawn across a column between two consecutive figures in the same column).

12. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

APPENDIX ASUMMARY OF FATAL EVENTS

The number of fatal events are revised (in the table below) to include those for which reports were received too late for inclusion in statistics for the appropriate year.

FATAL EVENTS, SOUTH AUSTRALIA

Year of occurrence	While working	Accidents			Diseases	Total
		During journeys	During recesses			
1975-76	18	n.a.	n.a.		17	35
1976-77	16	n.a.	n.a.		11	27
1977-78	11	n.a.	n.a.		8	19
1978-79	20	n.a.	n.a.		9	29

1983-84	14	7	-		7	28

APPENDIX BNOISE INDUCED HEARING LOSS CLAIMS

The noise induced hearing loss (NIHL) data in the Tables below refer to non-fatal diseases which generally involve little or no time lost from work: those cases involving time lost of one week or more are included also in the main tables.

TABLE 1 - NOISE INDUCED HEARING LOSS : OCCUPATION GROUP, NUMBER AND AMOUNT PAID
SOUTH AUSTRALIA, 1983-84

SUMMARY OF ORIGINAL CLAIMS

The Table below is a summary of original claims within the scope of the collection. For details of the break in series between 1980-81 and earlier years, see paragraph 8 of the Explanatory Notes.

2. Details relating to journey and recess accidents are excluded from Tables 1 to 23 because these events are not generally associated with the occupation of the employee nor the industry of the employer, and may not occur in the normal workplace or in the course of normal working activities.

3. Figures in the Table below are not adjusted for the effects of late reporting. For revised estimates of the number of fatal events, see Appendix A and for information enabling revised estimates of non-fatal events to be calculated, see Appendix E.

Year	ORIGINAL CLAIMS							
	Non-fatal Accidents			Non-fatal Diseases			Total Non-fatal	Total Fatal
	While working	During journeys	During recesses	NIHL of less than 1 week	Other

1982-83	54,353 (57)	5,999 (56)	379 (48)	1,096 (51)	8,781 (56)	70,609 (57)	2,653 (79)	73,262 (57)
1983-84	64,028 (62)	6,482 (57)	599 (52)	1,486 (44)	10,968 (58)	83,563 (61)	1,243 (53)	84,807 (61)

(a) From 1980-81 the number in brackets shows the percentage of the adjacent figure due to unclosed claims (see paragraph 2(b) of Explanatory Notes).
 (b) The significant increase in 1981-82 and subsequent decline in 1982-83 was influenced by amendments to the Workers Compensation Act which applied from 1 July 1982.
 (c) From 1980-81 permanent total disability cases have no time lost; previously such cases were allotted 156 weeks. There were 78 cases in 1983-84.

Of the 12,577 non-fatal accident and disease claims for 1983-84 shown above, 412 involved time on light duties (in addition to time actually lost or estimated to be lost from work) totalling 2,566 weeks.

Total compensation already paid in respect of the 12,605 claims for 1983-84 of \$33.18 million consisted of \$18.95 million in the form of weekly payments, \$5.39 million lump sum payments and \$8.84 million other hospital and medical etc. payments. It was estimated that a further \$51.63 million of payments would be made in respect of these claims.

APPENDIX D

RE-OPENED CLAIMS

A number of closed original claims are re-opened because of additional payments or further incapacity in respect of the initial accident or disease. Some of those re-openings add to the time lost and amount paid for events already counted, while others bring previously excluded events into the scope of this collection. In the Table below, figures are cumulative to date and are subject to revision should additional re-opened claims be received. Thus, the number of re-opened claims shown below, for example, for 1980-81 (452), includes those (441) shown in the previous issue of this Bulletin.

2. During the 1983-84 collection period a total of 245 re-opened claims were received in respect of original events which occurred in 1980-81 (11), 1981-82 (12), 1982-83 (19) and 1983-84 (203).

Year of occurrence of original event	RE-OPENED CLAIMS										
	Previously counted events					Additional events					
	Accidents					Accidents					Total
While working	During journeys	During recesses	Diseases	Total	While working	During journeys	During recesses	Diseases	Total	Total (a)

(a) The number in brackets shows the percentage of the adjacent figure due to unclosed claims (see paragraph 2(b) of Explanatory Notes).

(b) Included (with original time lost and original amount paid) in the appropriate tabulations of the bulletins concerned.

(c) Additional time lost only.

(d) Additional amount paid only.

APPENDIX E

LATE REPORTS

'Late reports' is the term given to those non-fatal events for which reports were received too late for inclusion in statistics for the appropriate year (see paragraph 3 of the Explanatory Notes) and include only original claims. In the Table below, figures are cumulative to date and are subject to revision should additional late reports be received.

2. Thus the latest estimate of the number of original claims for non-fatal accidents in 1982-83 while working is $(10,743 + 81) = 10,824$ rather than 10,743 as shown in Appendix C and in the 1982-83 issue of this Bulletin.

Year (a)	LATE REPORTS											
	Number			Time lost			Amount paid					
	Accidents	Accidents	Accidents	Time lost	Time lost	Time lost	Amount paid	Amount paid	Amount paid			
Year (a)	while working	Diseases (b)	Total (c)	while working	Diseases (b)	Total (c)	Accidents	while working	Diseases (b)	Total (c)		
1975-76	n.a.	n.a.	188	n.a.	n.a.	6,337	n.a.	n.a.	n.a.	1,807.5		
1976-77	n.a.	n.a.	241	n.a.	n.a.	8,990	n.a.	n.a.	n.a.	3,343.5		
1977-78	n.a.	n.a.	233	n.a.	n.a.	8,910	n.a.	n.a.	n.a.	3,890.6		
1978-79 r	n.a.	n.a.	154	n.a.	n.a.	6,210	n.a.	n.a.	n.a.	3,046.8		
1979-80	n.a.	n.a.	105	n.a.	n.a.	4,154	n.a.	n.a.	n.a.	1,958.6		
1980-81 r	280	39	373	4,093	700	5,449	3,200.1	619.0	3,819.1	4,329.6		
1981-82 r	410	90	578	5,280	1,778	7,690	5,162.2	1,124.9	6,287.1	6,697.5		
1982-83	81	16	111	1,380	309	1,866	1,687.8	341.2	2,028.0	2,180.6		

(a) Refers to the year in which the reports should have been included.
 (b) Excludes noise induced hearing loss (NIHL) cases involving less than 1 week of time lost.
 (c) From 1980-81, includes NIHL cases involving less than 1 week of time lost and journey and recess cases. See paragraph 8 of the Explanatory Notes.

APPENDIX F

CLAIMS LODGED AND COMPENSATION PAID

The number of all effective claims lodged with insurance companies, self-insurers and State Government departments (including claims involving work absences of less than one week, journey and recess cases) and the amount of compensation paid during each year 1972-73 to 1983-84 are shown below.

Year	Effective claims lodged	Compensation paid		
			No.	\$'000
1972-73	75,000	15,400		
1973-74	87,000	21,300		
1974-75	84,000	36,200		
1975-76	78,000	46,700		
1976-77	75,100	49,200		
1977-78	66,500	54,500		
1978-79	64,900	56,400		
1979-80	69,700	63,800		
1980-81	72,400	78,300		
1981-82	73,400	92,700		
1982-83	60,800	110,100		
1983-84	58,200	129,900		

INDUSTRIAL INJURY OR DISEASE
